

Mains supply AC-12VDC 24W – For self priming pump

Simple, compact and reliable

The new M82820 mains supply is designed to power the self priming pump A092819C. It is compatible with any mains supply from 115/60 to 240/60 and delivers a clean 12V DC stabilized voltage and 2A max draw.

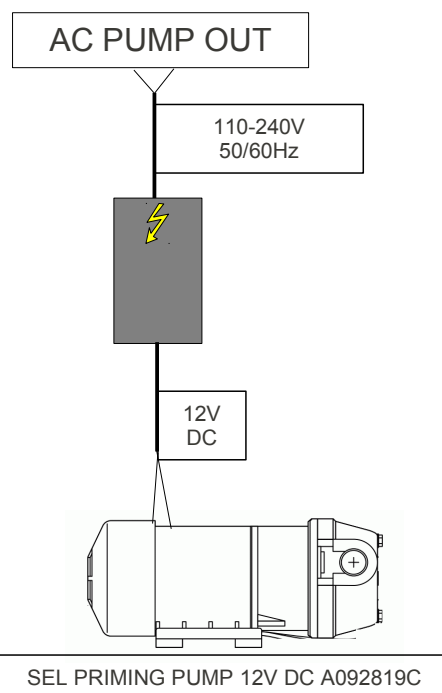

Mains supply AC-12V DC M82820

Mains adaptor M82820 + self priming pump A092819C

The combination of the M82820 mains supply and the self priming pump makes the installation of small air-conditioners very simple as the sea water intake and discharge is very easily obtained from existing sea cocks. The only precaution is to install a correct sea strainer in order to protect the pump valves. The mains adaptor is supplied with velcro tabs to install it on the control box of the air-conditioner.

MODEL	M82820
Mains supply voltage	115 – 240 V
Mains supply frequency	50-60 Hz
Max amperage draw	2 A
Weight	80 gr.
Dimensions in mm.	110 x 50 x 40
