

Retrofit BlueCool MyTouch to older S-,C-,V-,P- Series

Retrofitting a MyTouch display WBCL 151002A to older BlueCool units is possible for C- and V-Series using a controller card with part number index WBCL000842**C** or higher. P-Series with WBCL000894**A** or higher, S-Series with WBCL050930**B** or higher.

If the Digital Control panel is changed for a MyTouch display make sure a new display cable is used. Either use the Webasto display cables shown below or standard network cable (CAT cable)

Retrofit is possible for following controller cards

C/V-Series: WBCL000842**C** or higher
P-Series: WBCL000894**A** or higher
S-Series: WBCL050930**B** or higher

WBCL151001A

Display cable
MyTouch 5m

WBCL151005A

Display cable
MyTouch 10m

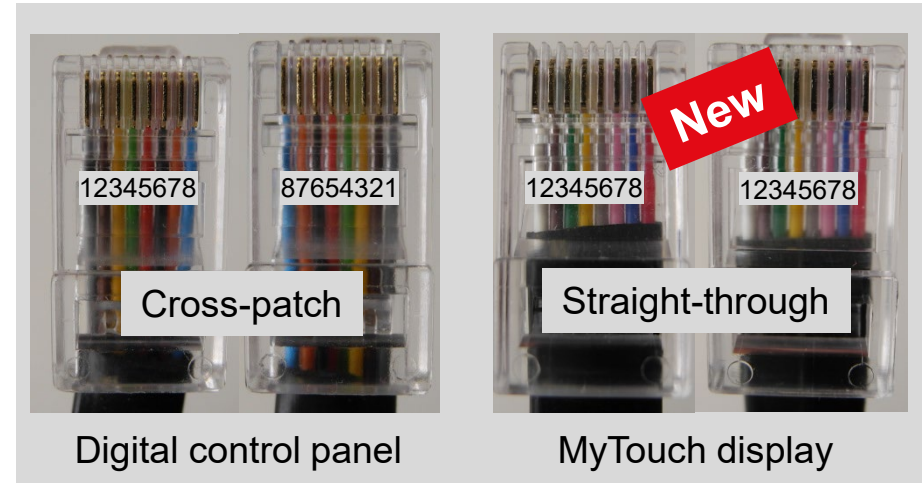

Refer to instructions of BlueCool Expert Tool 1.43 for firmware update to achieve MyTouch compatibility. Expert Tool 1.43 available at dealers.webasto.com

Retrofit BlueCool MyTouch to older S-,C-,V-,P- Series

If the replacement of the display cable is too complicated the existing display cable can be used.

The PIN assignment must be changed to standard straight through assignment. This can be done either with

- standard commercially obtainable crossover adapter
- manually crimping of the existing display cable to new PIN Assignment

PIN assignment of display connector at electronic box of BlueCool A/C unit

PIN assignment of display connector at Digital control panel

PIN assignment of display connector at MyTouch display
